

Renewal application validity status of RoHS 2.0 exemption clauses and exemption process

11 Categories of EEE covered by EU RoHS Directive : 1. Large household appliances. 2. Small household appliances. 3. IT and telecommunications equipment. 4. Consumer equipment. 5. Lighting equipment. 6. Electrical and electronic tools. 7. Toys, leisure and sports equipment. 8. Medical devices. 9. Monitoring and control instruments including industrial monitoring and control instruments. 10. Automatic dispensers. 11. Other EEE not covered by any of the categories above.

The following table is an updated summary of the status of the exemption clauses of the RoHS directive that expire in 2021 in Appendix III and Appendix IV (see yellow mark) (except for the mercury exemption for fluorescent lamps).

The RoHS exemption renewal application should be submitted within 18 months before the expiration of the exemption period. The existing exemption clauses will remain valid until the committee makes a decision.

If the application for renewal of exemption is rejected or the exemption is revoked, the exemption will expire at the earliest 12 months from the date of the decision and 18 months at the latest. There is no official announcement of the rejection of the application for renewal of exemption at this moment.

Exemption for which no application for renewal was submitted in due time will expire on the date specified in Article 5 or in the relevant annex of the Directive.

HONGCAI TESTING

ANNEX III

Exemption	Scope and dates of applicability	Validity status	
▼M41 May 18, 2018,EU issued amendment directive (EU) 2018/739			
6(a)	Lead as an alloying element in steel for machining purposes and in galvanised steel containing up to 0,35 % lead by weight	Expires on: — 21 July 2021 for categories 8 and 9 other than in vitro diagnostic medical devices and industrial monitoring and control instruments; — 21 July 2023 for category 8 in vitro diagnostic medical devices; — 21 July 2024 for category 9 industrial monitoring and control instruments, and for category 11.	Valid - requested for renewal
6(a)-I	Lead as an alloying element in steel for machining purposes containing up to 0,35 % lead by weight and in batch hot dip galvanised steel components containing up to 0,2 % lead by weight	Expires on 21 July 2021 for categories 1-7 and 10.	Valid - requested for renewal
▼M42 May 18, 2018,EU issued amendment directive (EU) 2018/740			
6(b)	Lead as an alloying element in aluminium containing up to 0,4 % lead by weight	Expires on: — 21 July 2021 for categories 8 and 9 other than in vitro diagnostic medical devices and industrial monitoring and control instruments, — 21 July 2023 for category 8 in vitro diagnostic medical devices, — 21 July 2024 for category 9 industrial monitoring and control instruments, and for category 11.	Valid - requested for renewal

HONGCAI TESTING

	which are designed to be used periodically at temperatures below – 150 °C.		
▼ M12 January 9, 2014, EU issued amendment directive 2014/10/EU			
29	Lead in alloys, as a superconductor or thermal conductor, used in cryo-cooler cold heads and/or in cryo-cooled cold probes and/or in cryo-cooled equipotential bonding systems, in medical devices (category 8) and/or in industrial monitoring and control instruments.	Expires on 30 June 2021.	Valid - requested for renewal
31a	Lead, cadmium, hexavalent chromium, and polybrominated diphenyl ethers (PBDE) in spare parts recovered from and used for the repair or refurbishment of medical devices, including in vitro diagnostic medical devices, or electron microscopes and their accessories, provided that the reuse takes place in auditable closed-loop business-to-business return systems and that each reuse of parts is notified to the customer.	Expires on: (a) 21 July 2021 for the use in medical devices other than in vitro diagnostic medical devices; (b) 21 July 2023 for the use in in vitro diagnostic medical devices; (c) 21 July 2024 for the use in electron microscopes and their accessories.	Valid - requested for renewal
▼ M18 January 9, 2014, EU issued amendment directive 2014/16/EU			
34	Lead as an activator in the fluorescent powder of discharge lamps when used for extracorporeal photopheresis lamps containing BSP (BaSi2O5:Pb) phosphors.	Expires on 22 July 2021.	No longer valid
▼ M20 May 20, 2014, EU issued amendment directive 2014/70/EU

HONGCAI TESTING

39	<p>Lead in micro-channel plates (MCPs) used in equipment where at least one of the following properties is present:</p> <p>(a) a compact size of the detector for electrons or ions, where the space for the detector is limited to a maximum of 3 mm/MCP (detector thickness + space for installation of the MCP), a maximum of 6 mm in total, and an alternative design yielding more space for the detector is scientifically and technically impracticable;</p> <p>(b) a two-dimensional spatial resolution for detecting electrons or ions, where at least one of the following applies:</p> <p>(i) a response time shorter than 25 ns;</p> <p>(ii) a sample detection area larger than 149 mm²;</p> <p>(iii) a multiplication factor larger than 1,3 × 10³.</p> <p>(c) a response time shorter than 5 ns for detecting electrons or ions;</p> <p>(d) a sample detection area larger than 314 mm² for detecting electrons or ions;</p> <p>(e) a multiplication factor larger than 4,0 × 10⁷.</p>	<p>The exemption expires on the following dates:</p> <p>(a) 21 July 2021 for medical devices and monitoring and control instruments;</p> <p>(b) 21 July 2023 for in-vitro diagnostic medical devices;</p> <p>(c) 21 July 2024 for industrial monitoring and control instruments.</p>	Valid - requested for renewal
----	---	--	-------------------------------

Exemptions process:

1. Exemption application: The RoHS Directive allows for exemptions from its restrictions, under certain conditions defined in article 5(1), adapting the Annexes to scientific and technical progress. Exemptions are limited in time and reassessed on a regular basis, taking into account the availability, practicability and reliability of substitutes, the environmental, health and consumer safety impacts of substitution, the socioeconomic impact of substitution, any potential adverse impacts on innovation. Industry regularly applies for the renewal of exemptions or for additional applications to be exempted from the Directive's requirements. Each request must be evaluated, and when appropriate, an exemption is granted.

2. Application time:

- A decision on a RoHS exemption currently takes 18 to 24 months from the application date. Priority is given to older applications. Existing exemptions for which a renewal

HONGCAI TESTING

request has been submitted remain valid until a decision is taken by the Commission. This decision either indicates a new expiry date or, in case of rejection, grants a transition period of 12 to 18 months before the exemption expires.

- Exemptions for which no application for renewal was submitted in due time will expire on the date specified in Article 5 or in the relevant annex of the Directive.
- After submitting a request for a new exemption, equipment must comply with the Directive to be placed on the Union market, until a decision granting a new exemption is adopted by the Commission.

3. The Commission evaluation procedure involves a number of steps:

3.1 The technical and scientific assessment study and stakeholder consultation typically takes around 10 months.

3.2 Once a proposal has been made, the Commission consults with Member States and the European Parliament. You can access the agendas and minutes of the Member States expert group for RoHS 2 adaptation and enforcement in the Register of Commission Expert Groups.

3.3 The draft delegated directive/decision is then published for public feedback (4 weeks) and notified to the WTO Technical Barriers to Trade Committee (60 days).

3.4 The Delegated Directive will then be adopted by the Commission. The draft Delegated directives adopted by the Commission are available before official publication. The status of the draft delegated act is available in the Inter-institutional register of delegated acts.

3.5 The two-month scrutiny period of the European Parliament and the Council commences (an extension of the scrutiny period on request is possible). After this scrutiny period, in case of no objections from the co-legislators, the Delegated Directive will be published in the Official Journal.

HCT solution:

Relevant manufacturers and traders should make preparations in advance, promptly respond to the expiration of exemptions, and implement RoHS control. Shenzhen Hongcai Testing Technology Co., Ltd. has the qualifications of Guangdong Metrology Certification CMA and China National Accreditation Service for Conformity Assessment CNAS. It can help enterprises to export safely. Please call us for details.
