Canada Adds Products Containing Button/Coin Batteries and Their Packaging to CCPSA Table 3

On September 18, 2026, Health Canada issued a notice officially adding consumer products containing button or coin batteries, as well as packaging for button and coin batteries, to the scope of Table 3 of the general prohibitions under the Canada Consumer Product Safety Act (CCPSA). **From the date of listing, such products that do not meet the relevant requirements of the specified safety standards are prohibited from being manufactured, imported, advertised or sold in Canada.** The specific safety standards are as follows:

Product/Packaging Category	Standards(or equivalent standards)
For consumer products that are not toys	ANSI/UL 4200A-2023
toys	ASTM F963-23
Reclosable packaging	CAN/CSA Z76.1-99 (R2003) ISO 8317:2015
Non-reclosable packaging	CSA C22.2 No. 60086-4:19 (R2024) IEC/CEI 60086-4:2014 IEC/CEI 60086-5:2021 ISO 28862:2018
consumer products containing button/coin batteries or button/coin batteries sold alone	ANSI/UL 4200A-2023 CSA C22.2 No. 62368-1:25 ASTM F963-23 CSA C22.2 No. 60086-4:19 (R2004) IEC/CEI 60086-4:2014 IEC/CEI 60086-5:2021 ANSI C18.3M Part 2-2024 CSA C22.2 No. 62133-1:20 CSA C22.2 No. 62133-2:20

Health Canada may take immediate compliance and enforcement actions in line with the Department's compliance and enforcement policy framework when it has reasonable grounds to believe that a consumer product is a danger to human health or safety. **Regulated parties that fail to comply voluntarily may be subject to enforcement actions under the CCPSA, which may include seizure, orders to take corrective measures, orders to recall products, administrative monetary penalties, or criminal prosecution.**

Health Canada will continue to monitor the situation and may update this notice and the associated danger to human health or safety assessment as warranted.

HCT SOLUTION:

Table 3 is a dynamic risk list within the “general prohibitions” framework under Canada’s Consumer Product Safety Act. It lists categories of consumer products that have been determined to present a danger and specifies the technical standards that must be met. For the companies concerned, once a product is included in Table 3, the compliance requirement becomes demonstrating conformity with the designated standards (or equivalent standards). Waltek HCT has a professional technical team and extensive compliance experience and can provide tailored solutions for companies.
